

Architecture in the PostModern Era

Lecture 4: Zaha Hadid

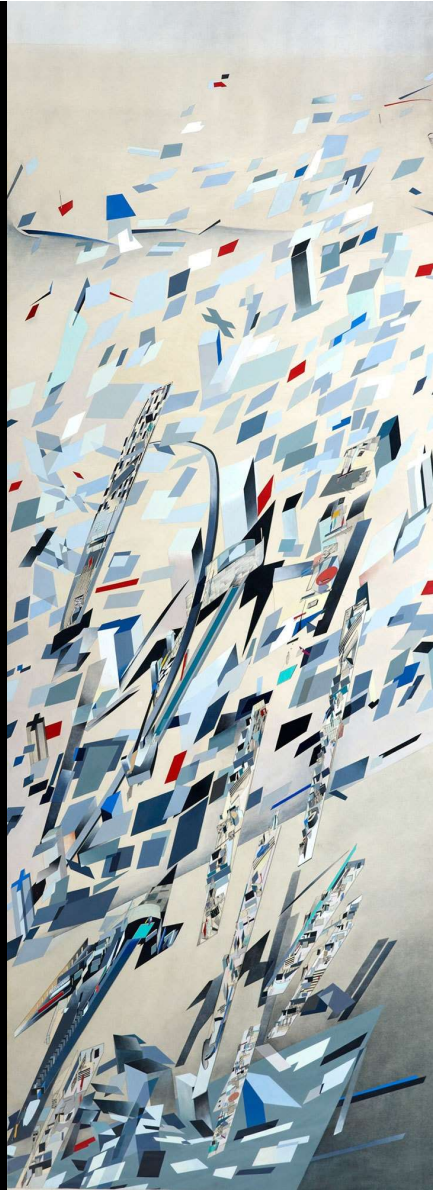

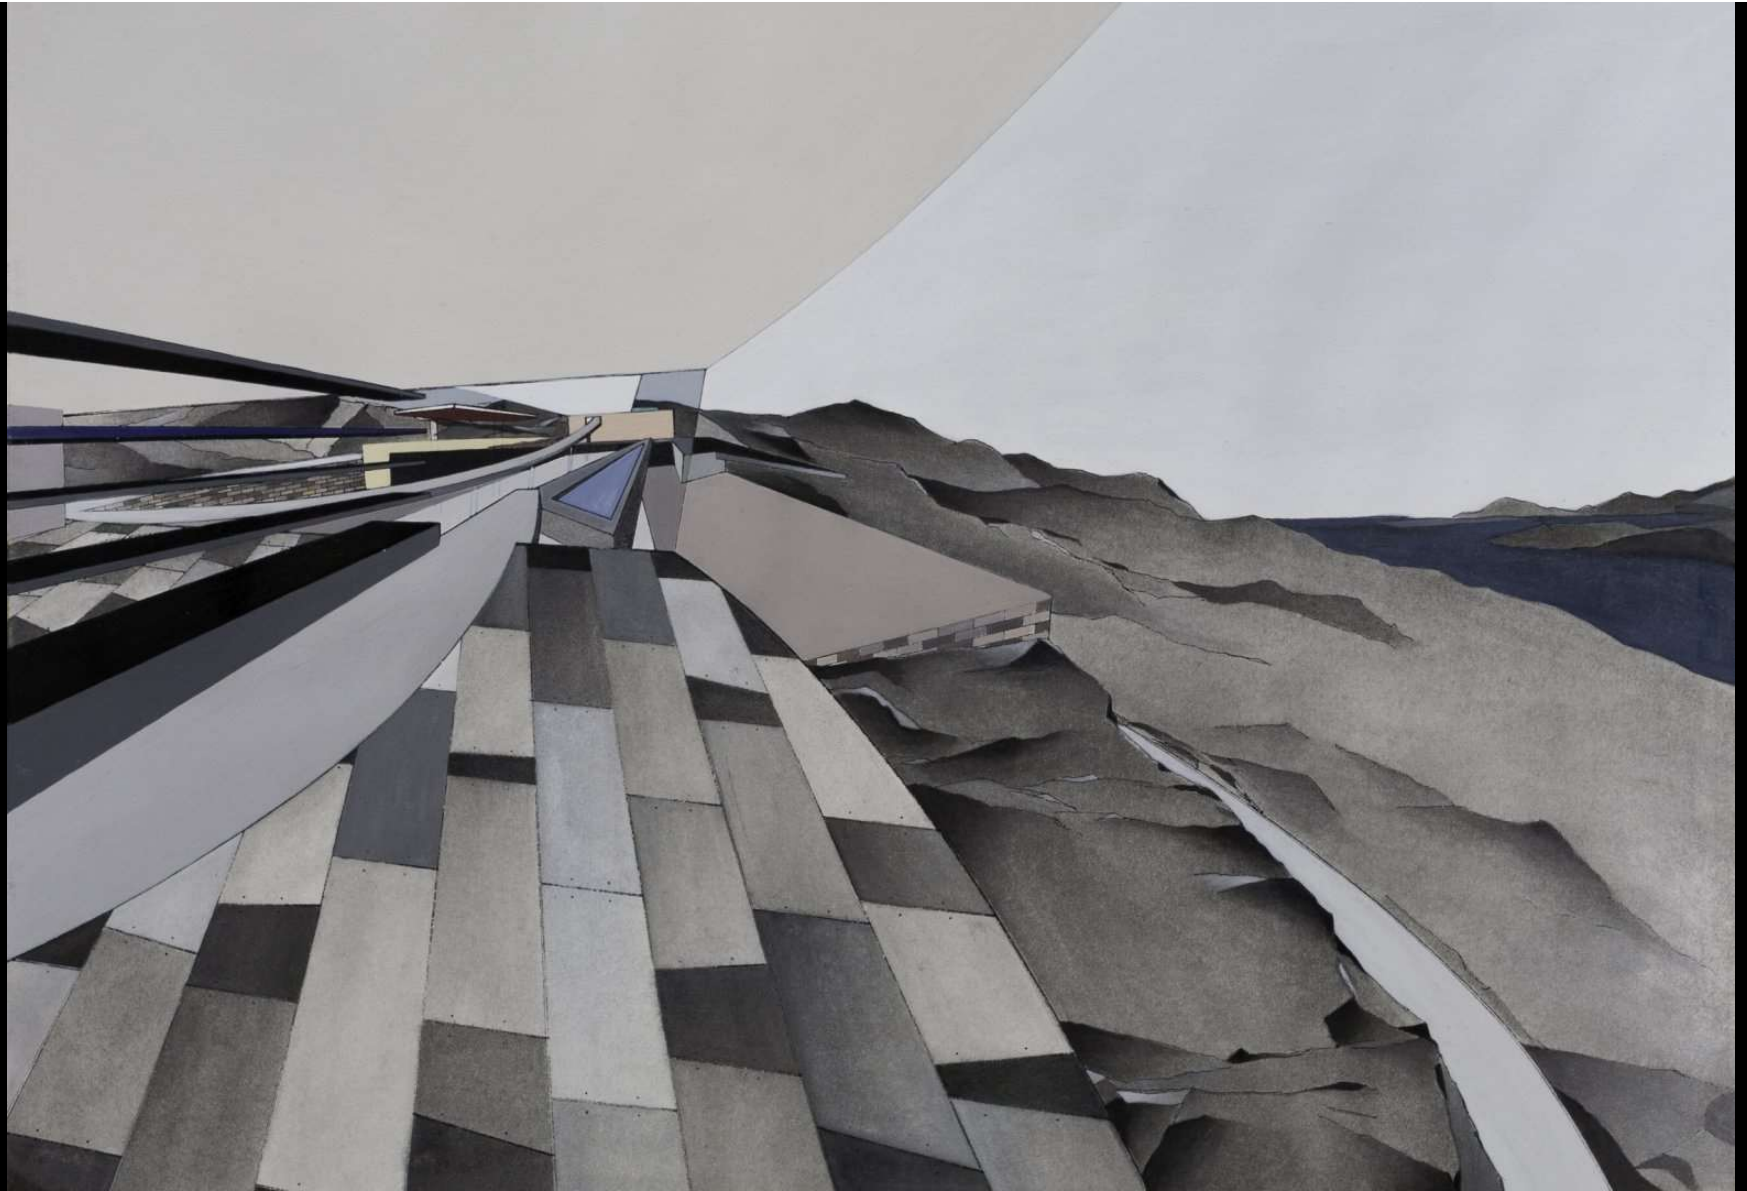

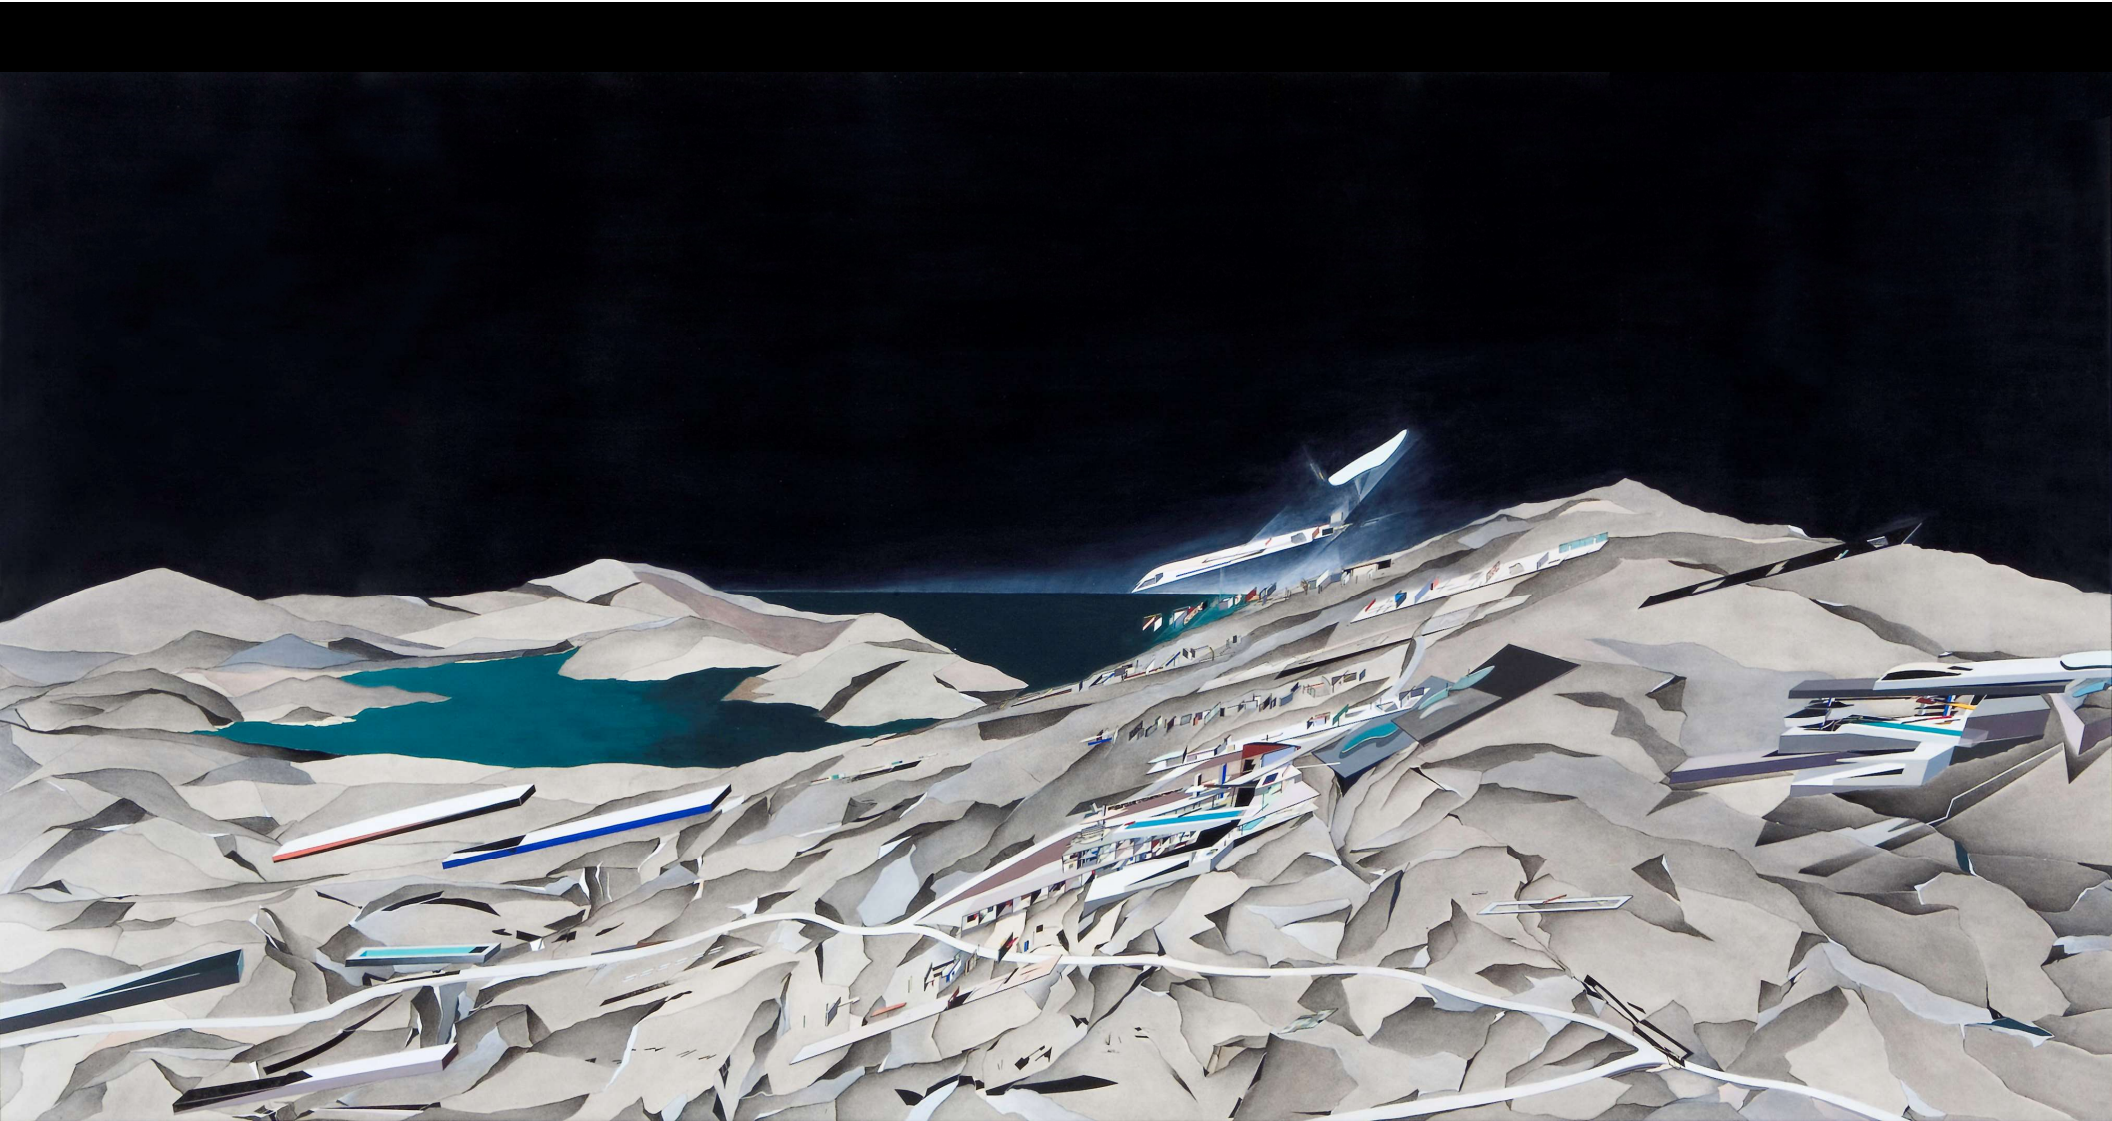

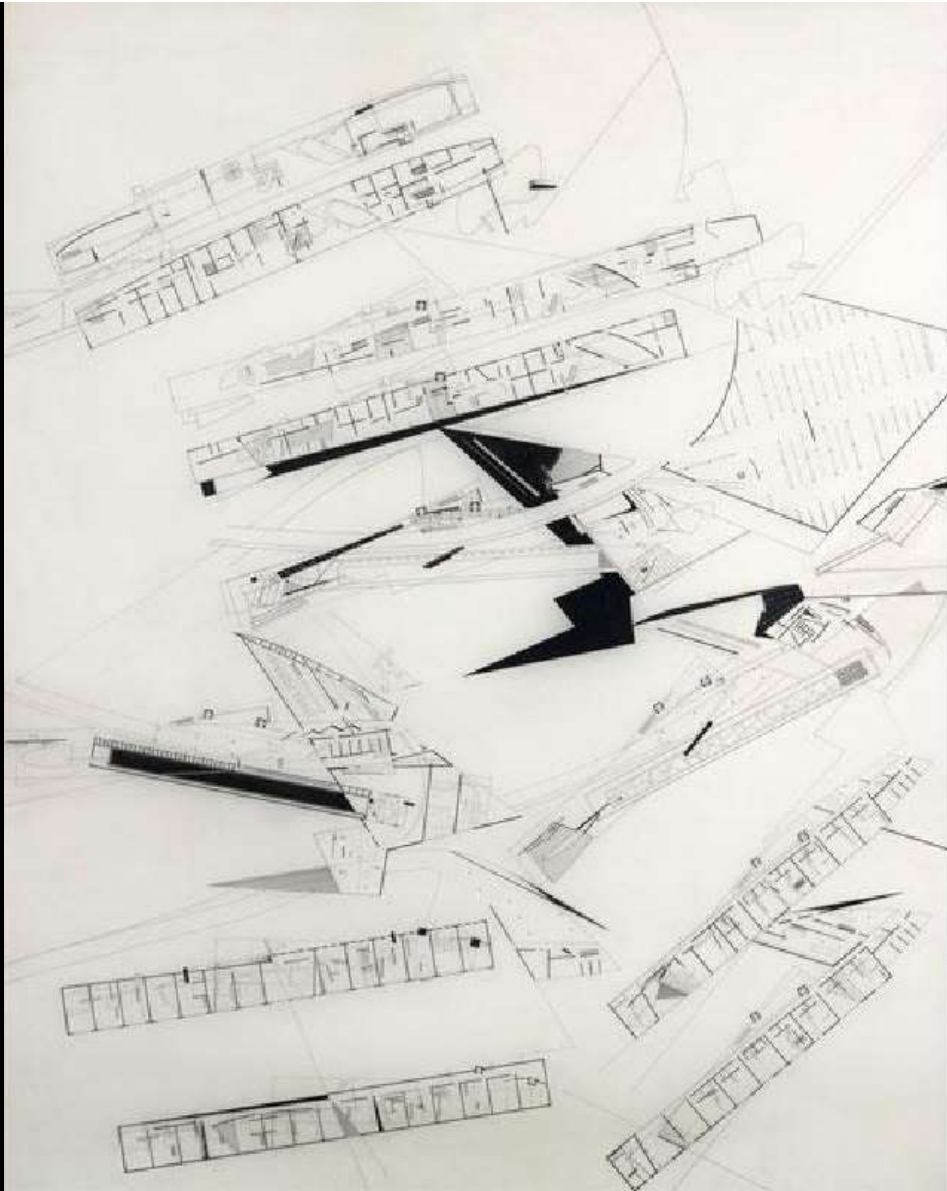

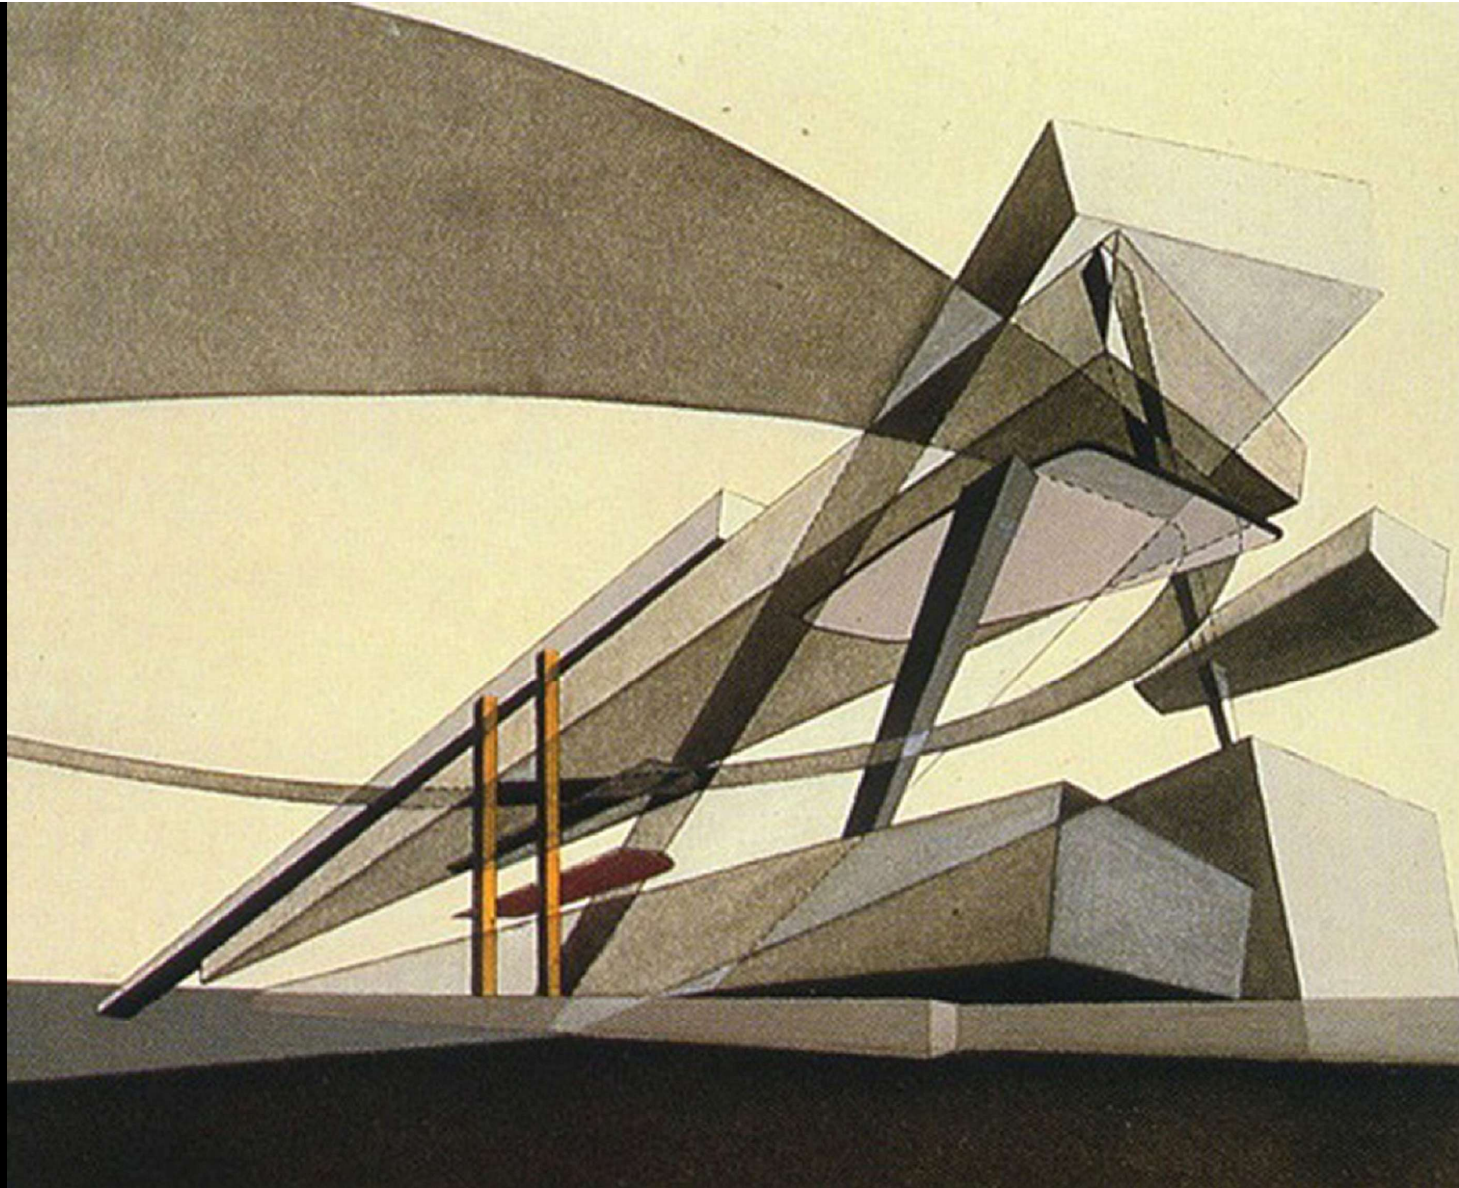

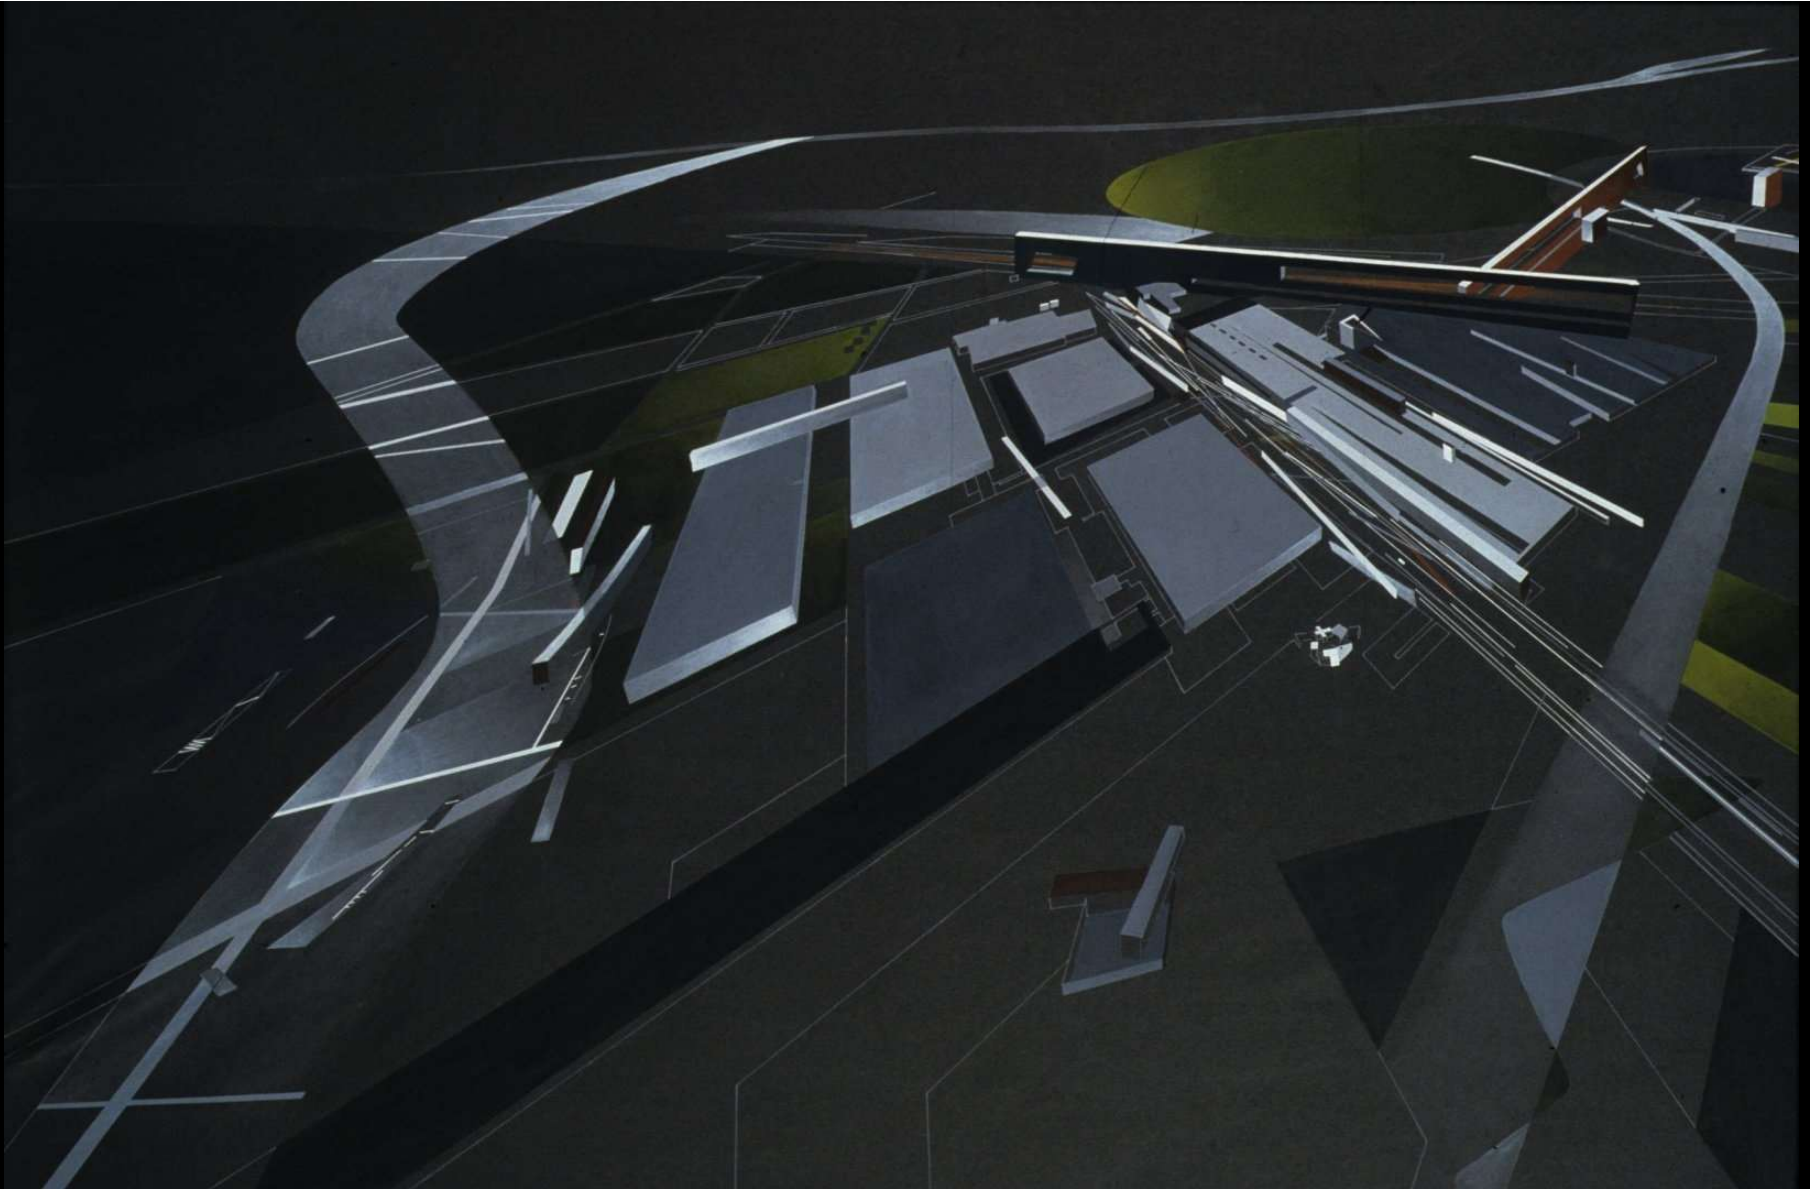

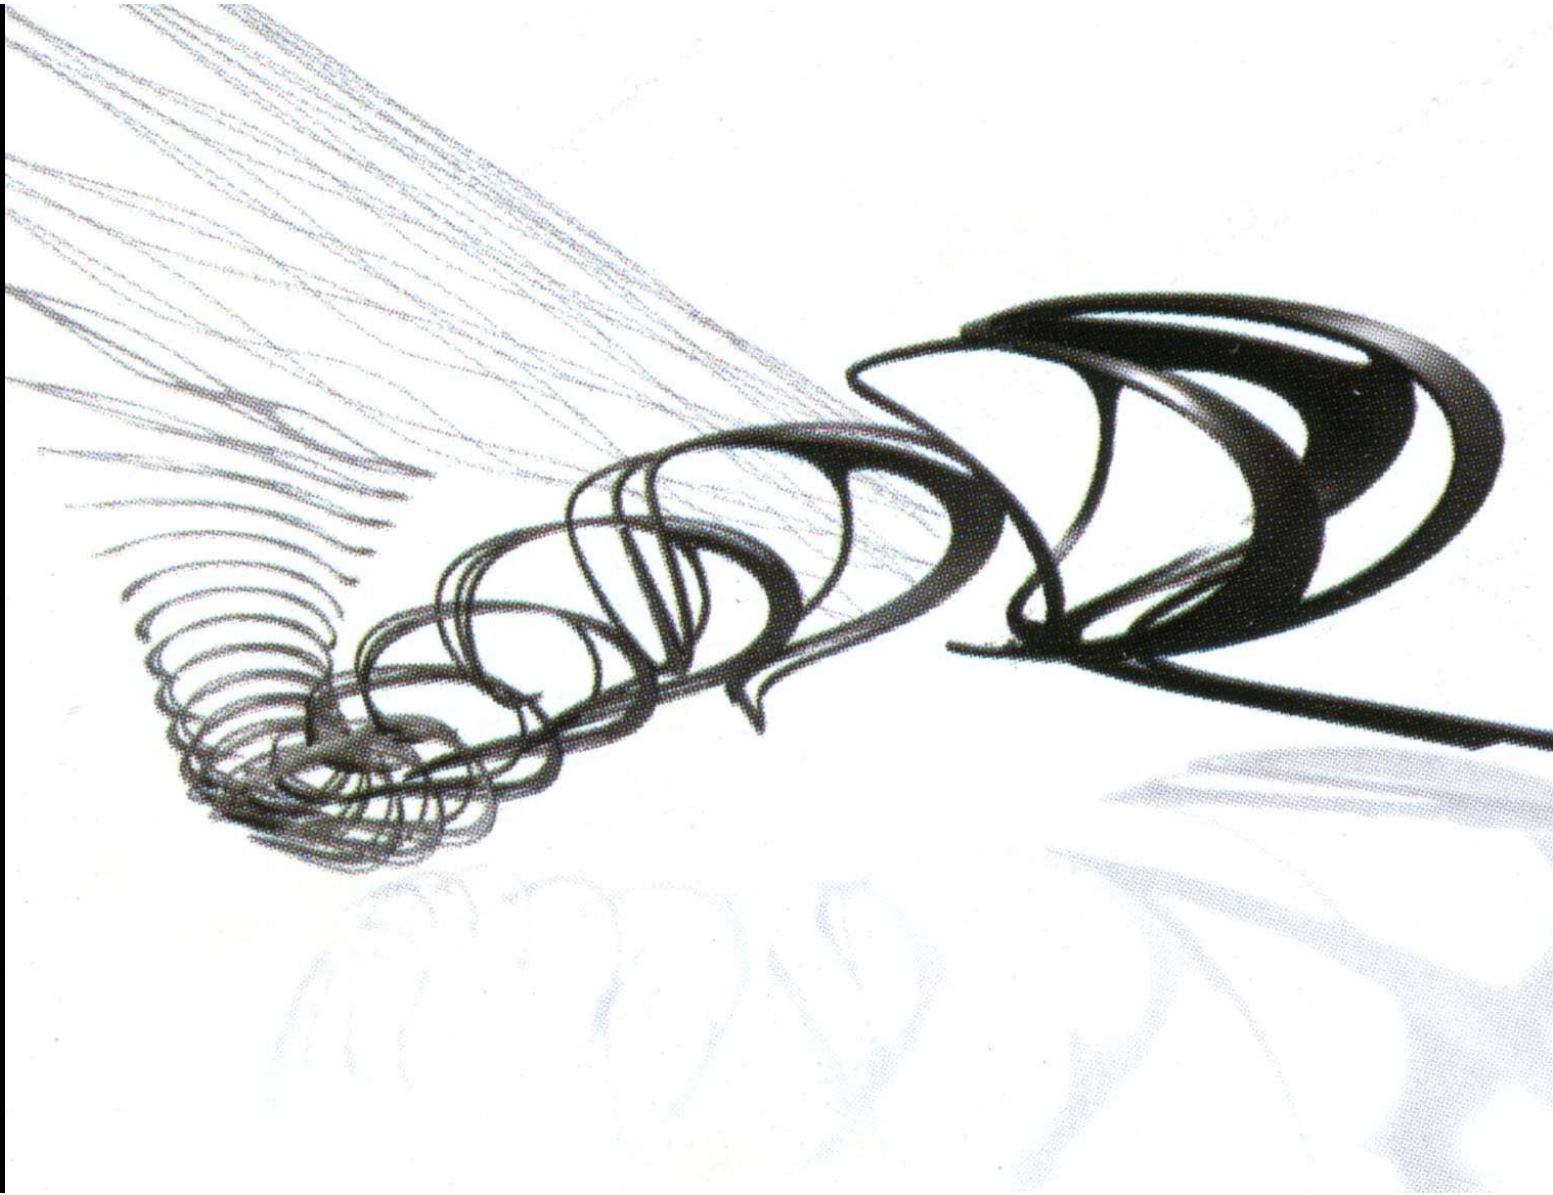

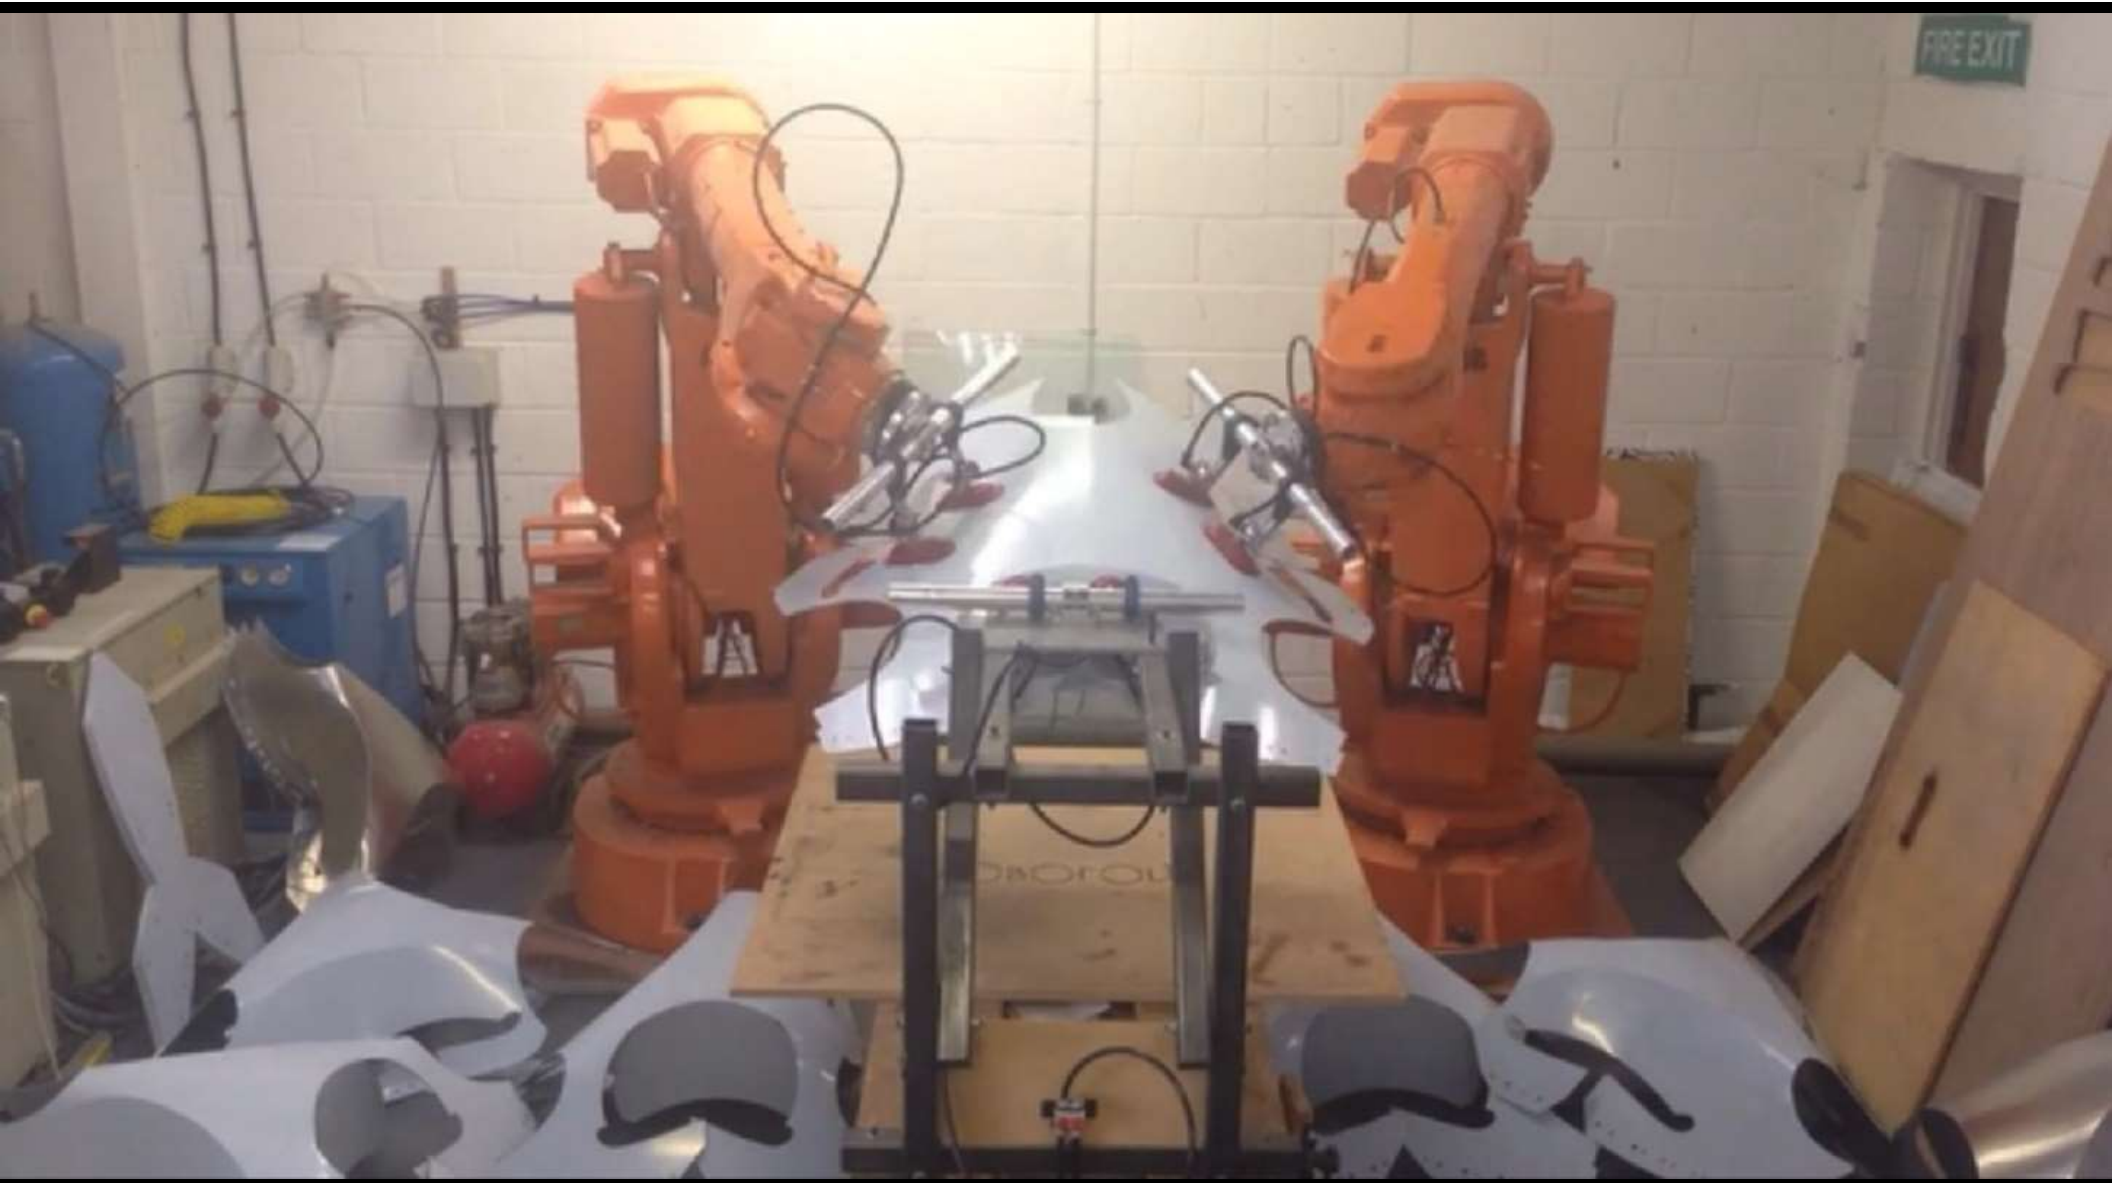

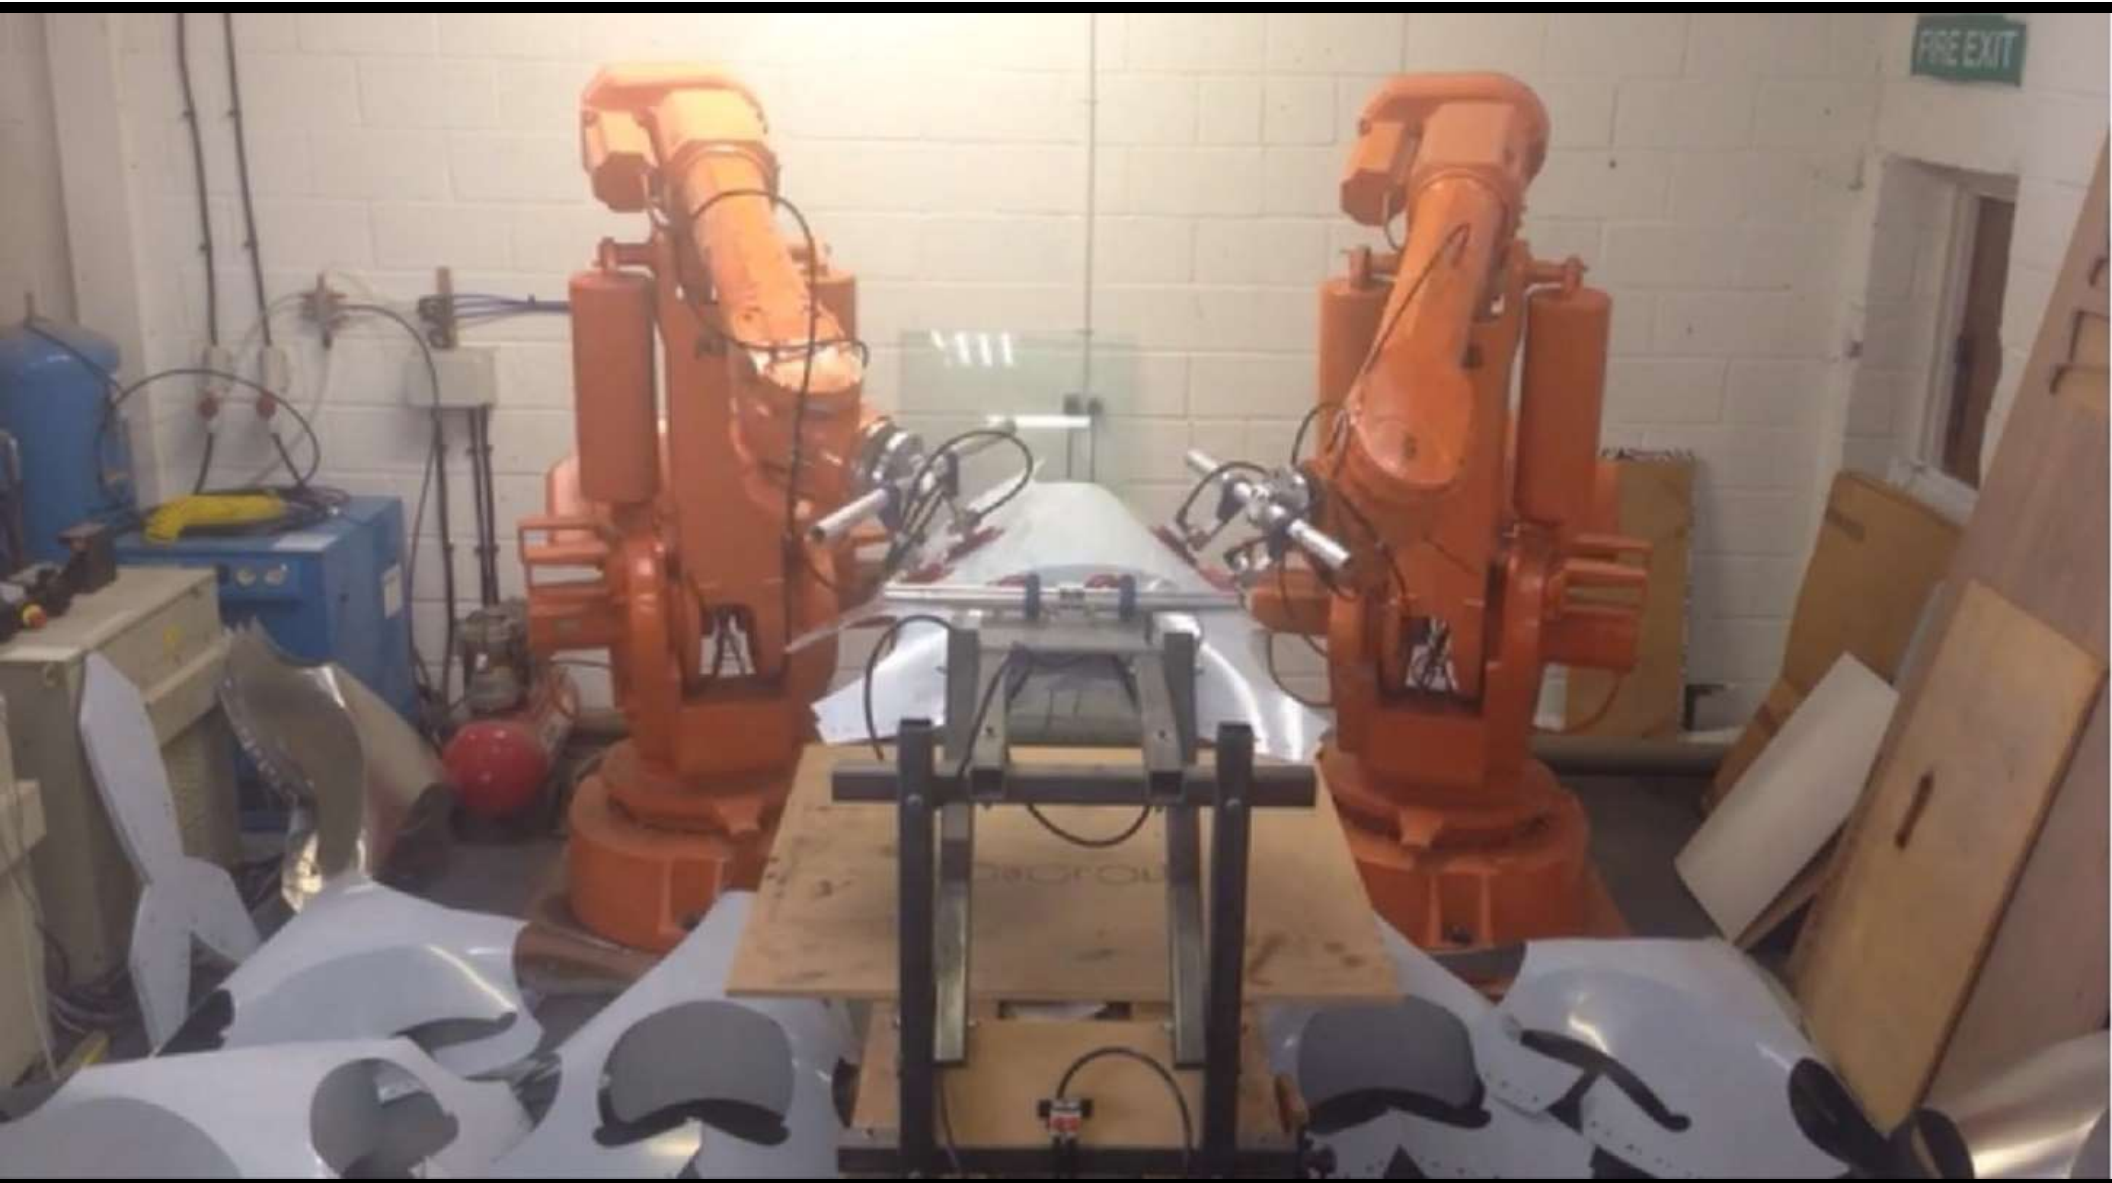

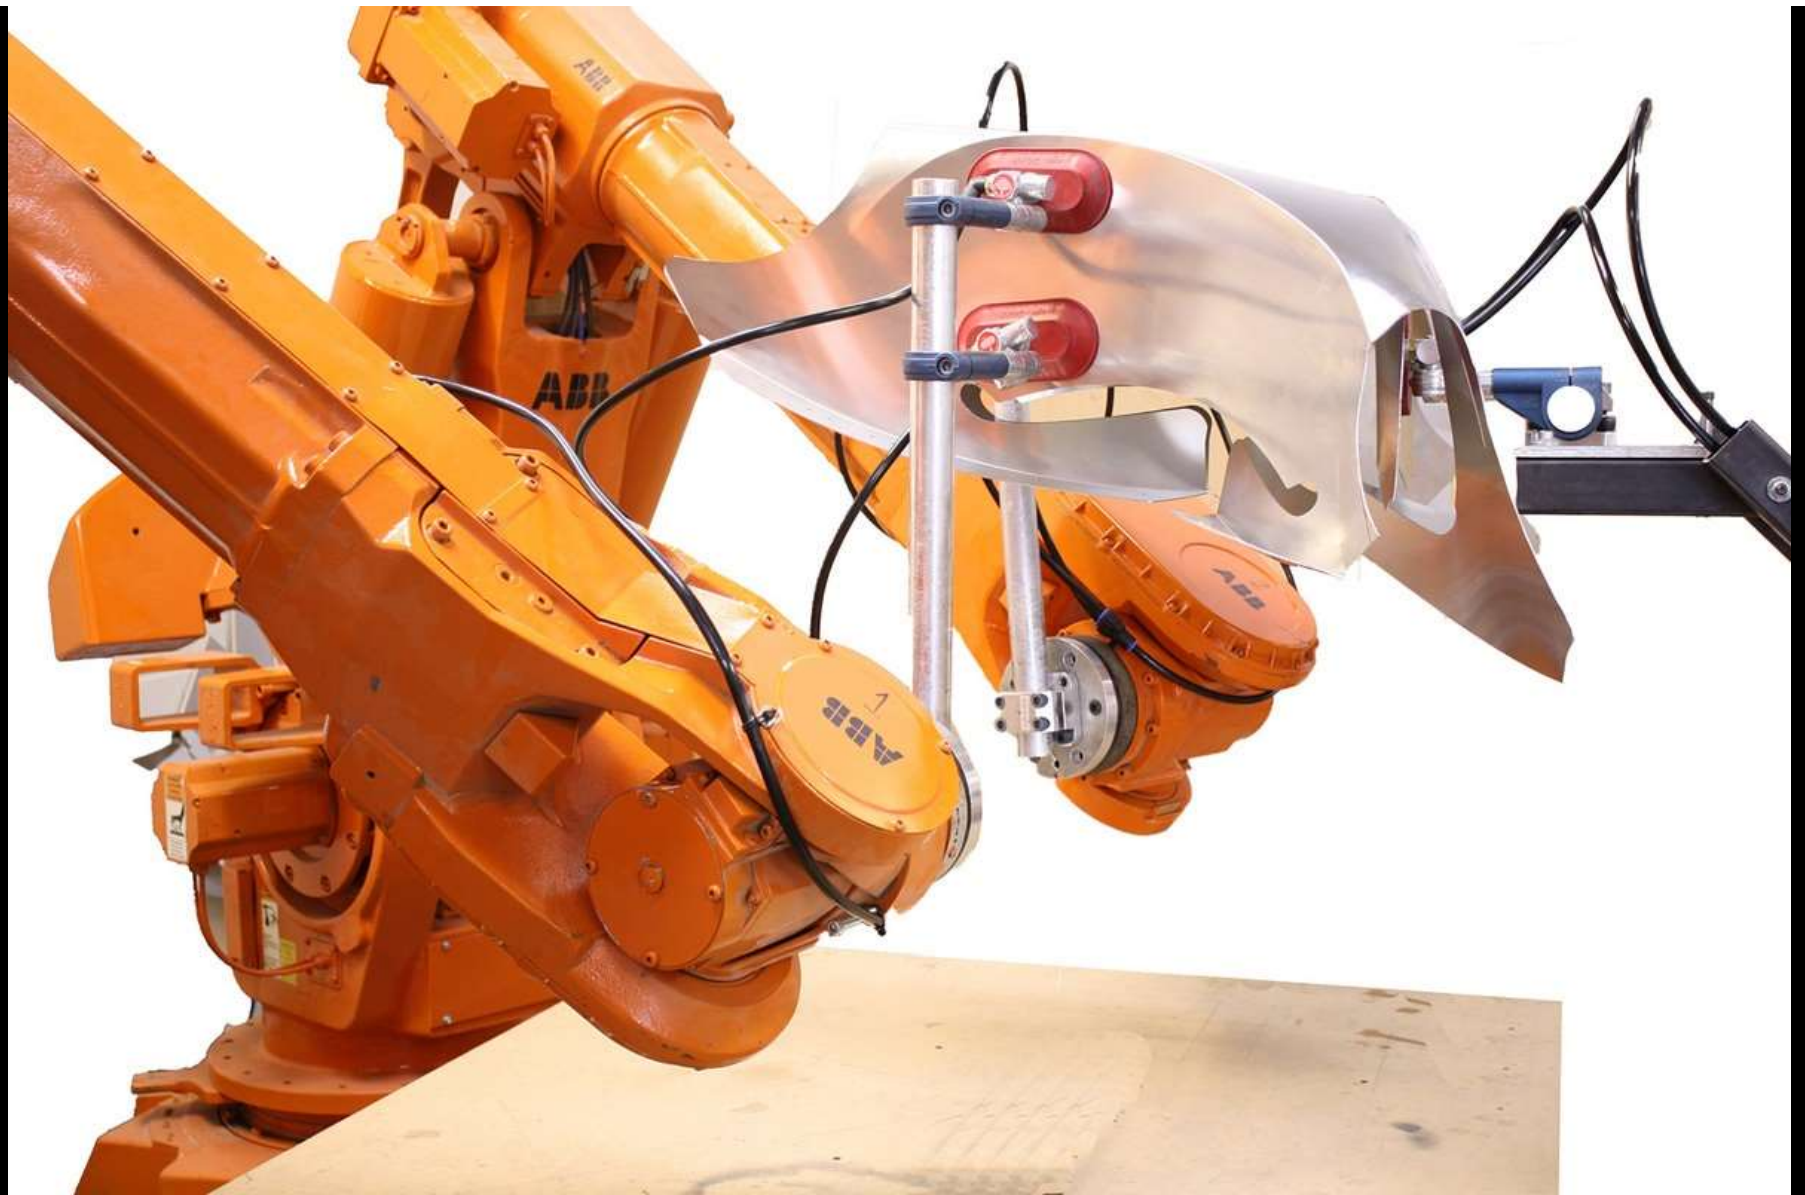

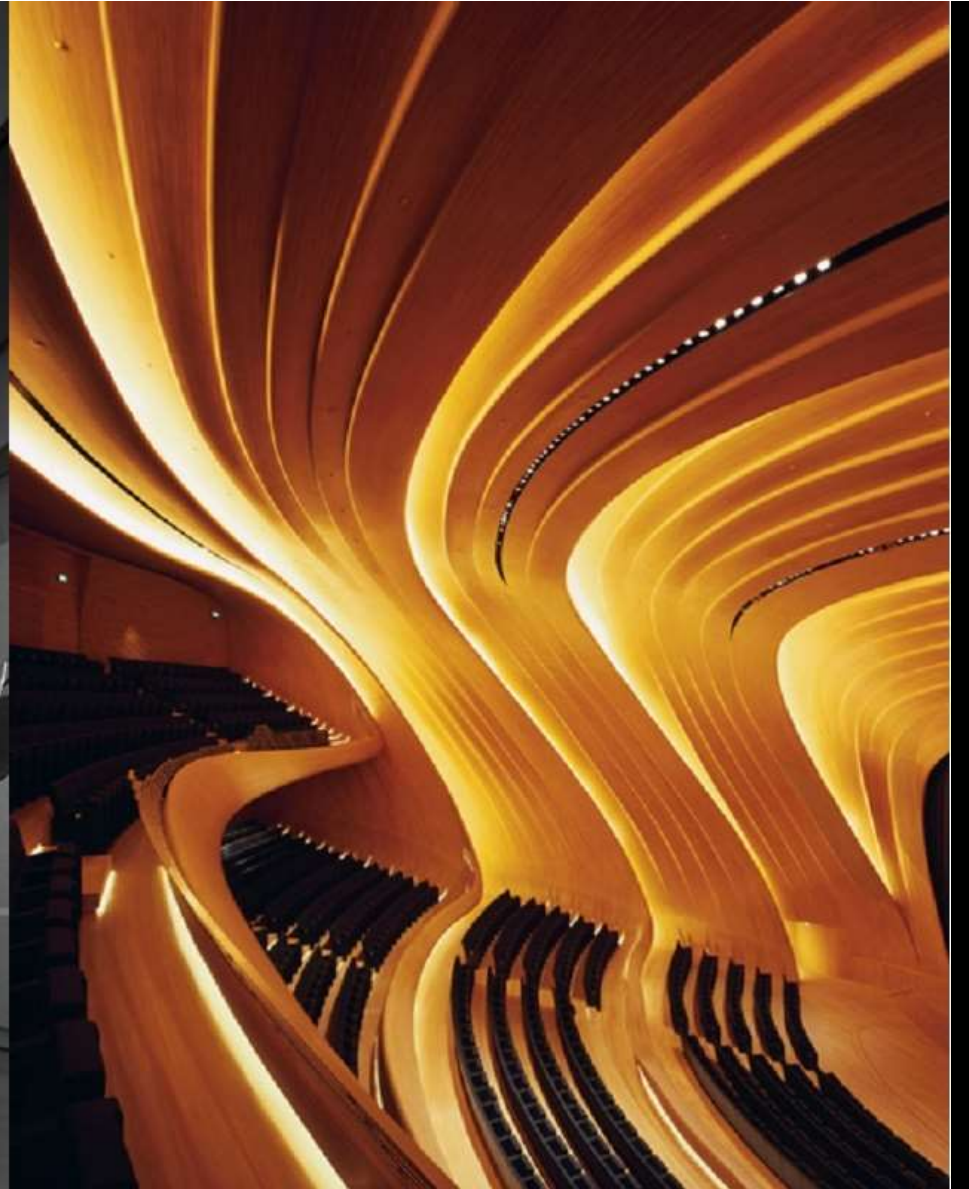

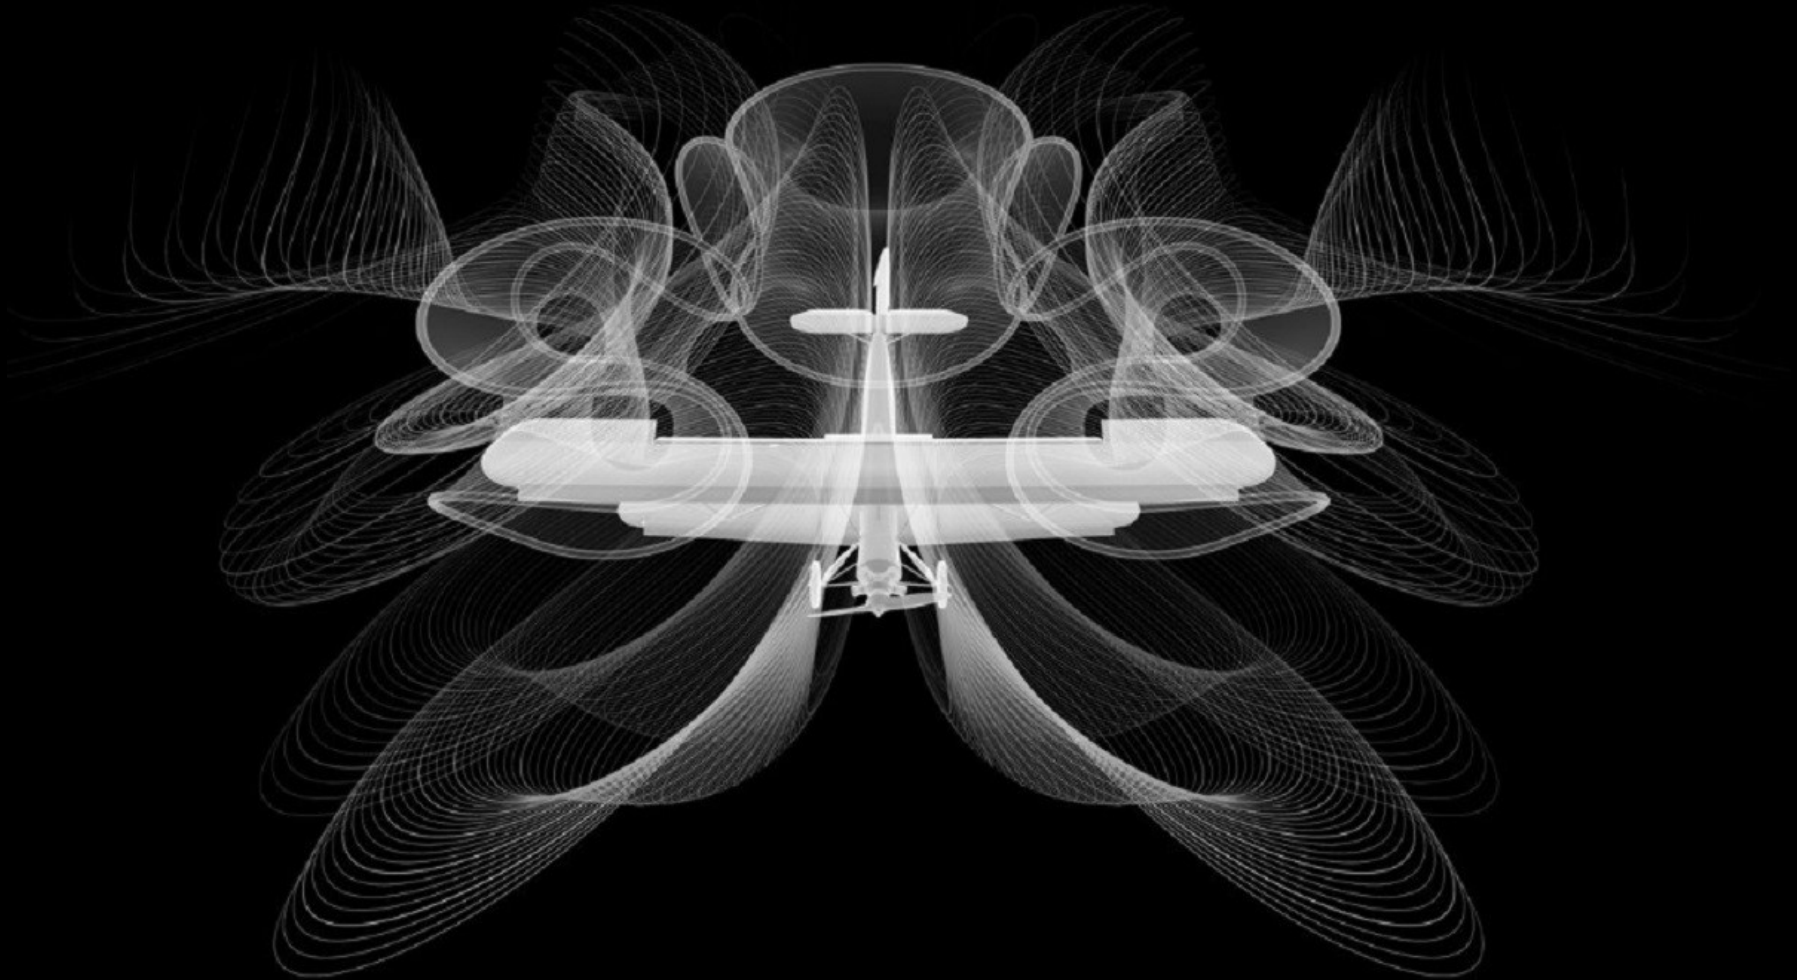

LIFE AND DEATH

The first modern aircraft with retractable landing gear and a high-wing configuration was the Boeing Stearman. It was used for training pilots during World War I and II. The Stearman was a simple, rugged aircraft that was easy to maintain and fly. It was also used for transport and cargo.

TRADE AND TRAVEL

The modern global economy is based on the ability to trade and transport goods and services across the world. This is made possible by the development of air travel. Air travel has revolutionized the way we live and work, making it possible to travel quickly and easily across the globe.
