

Ground Floor

Entrance to the Güell Palace was through double doors from the street. The doorman and coachman services were carried out from the ground floor.

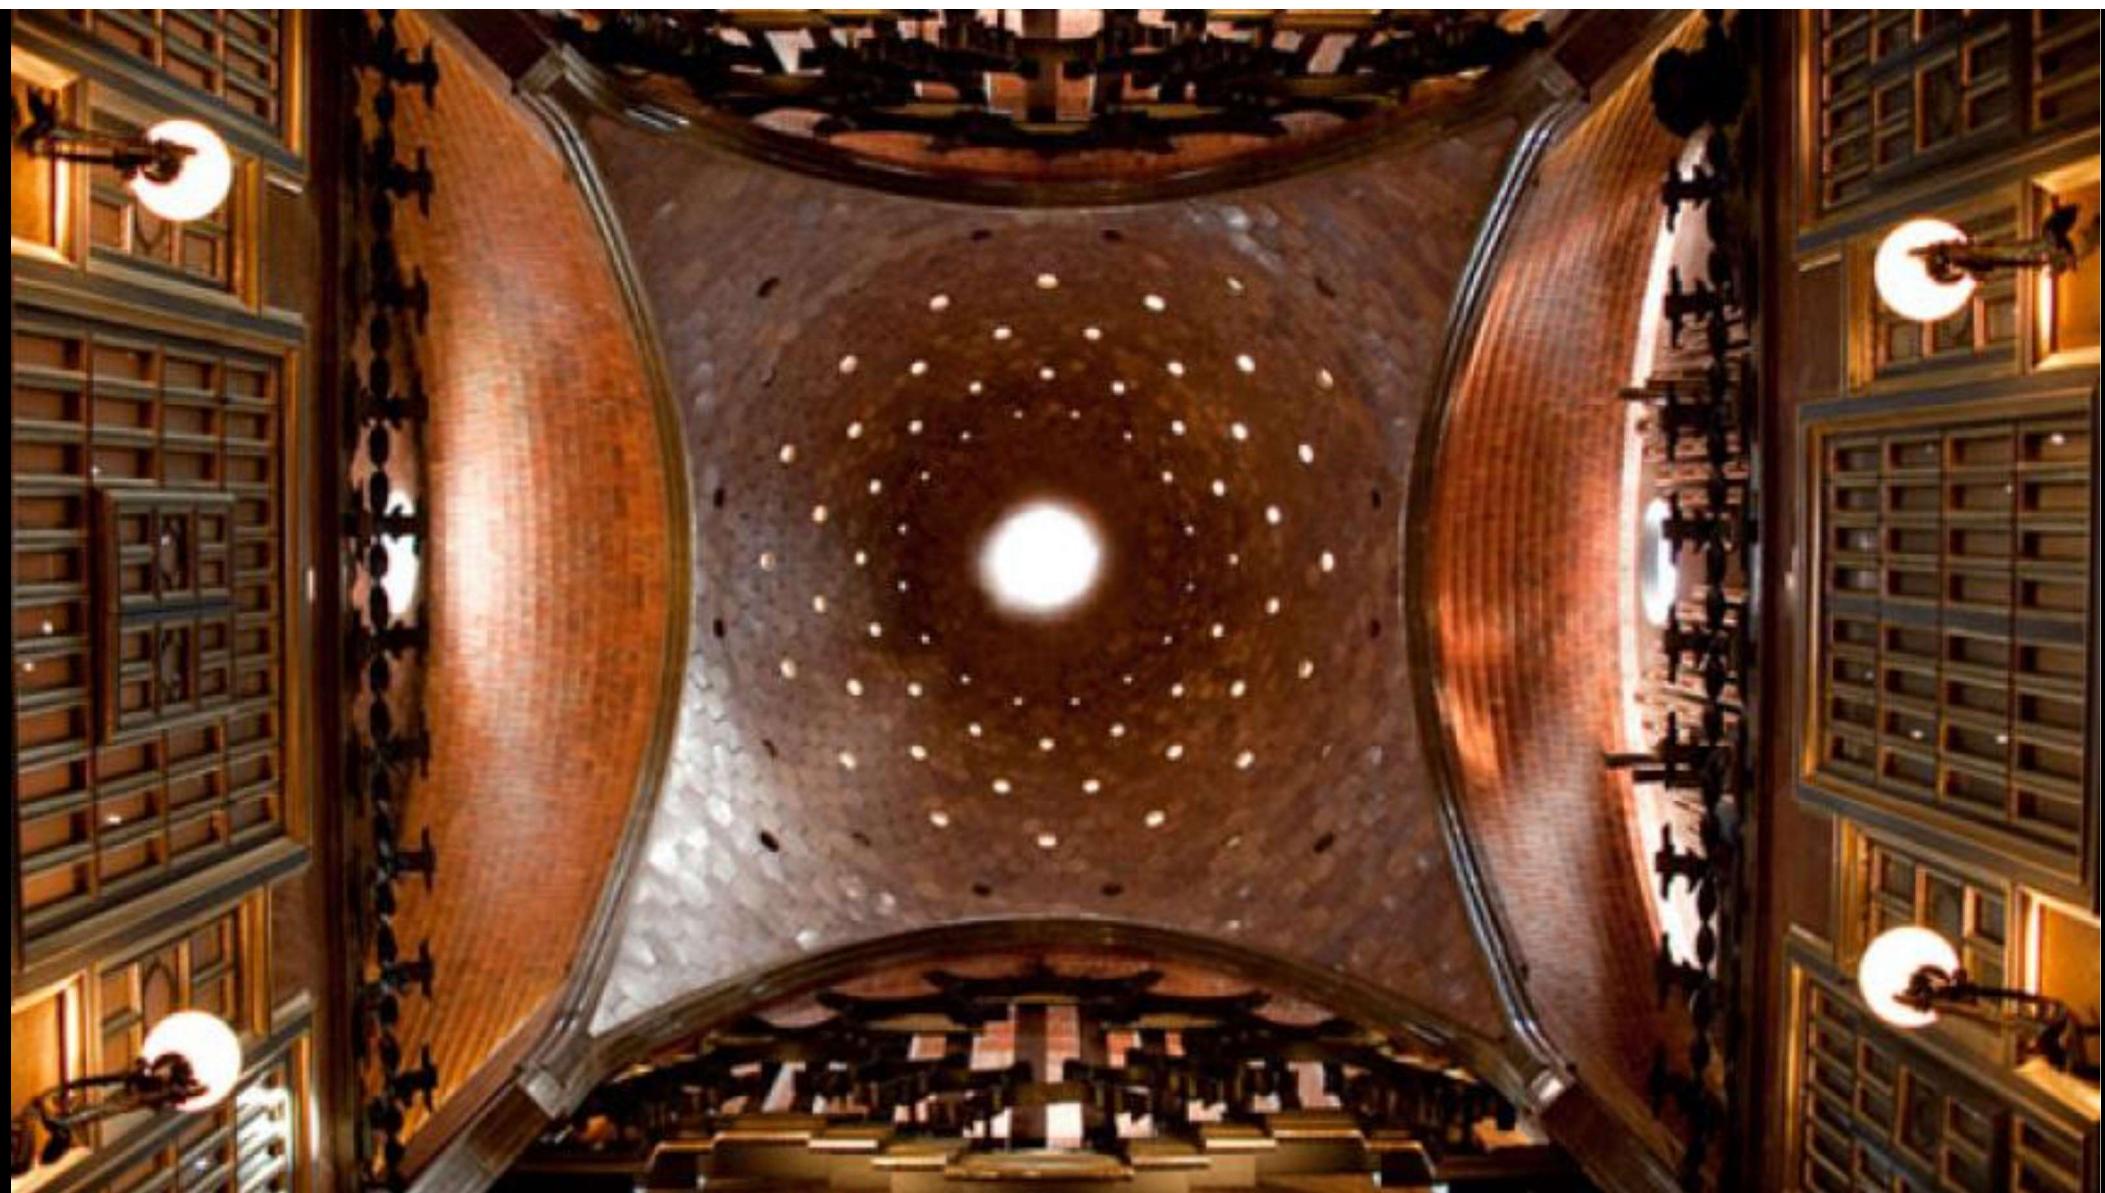

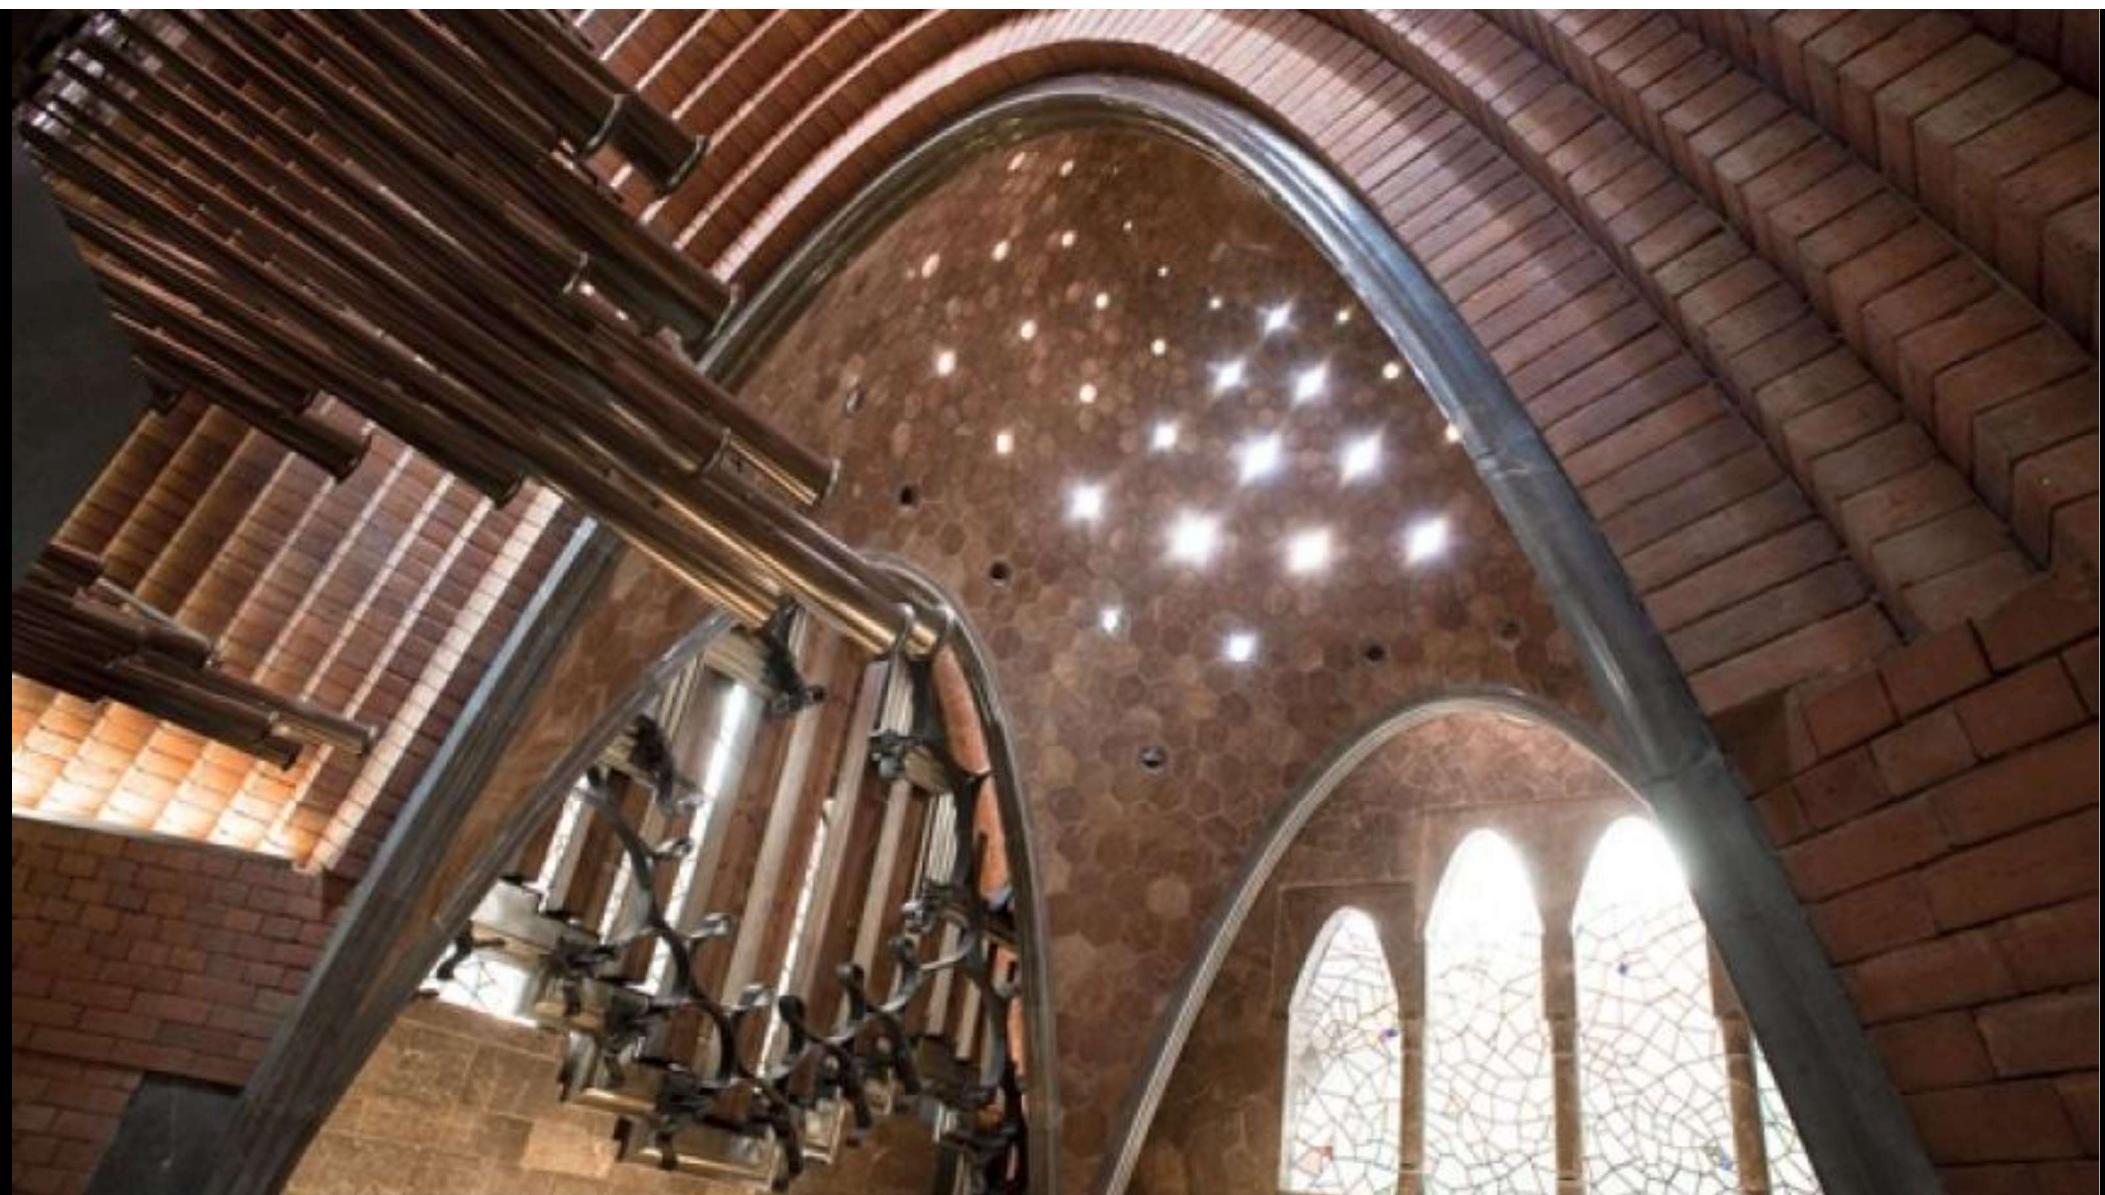

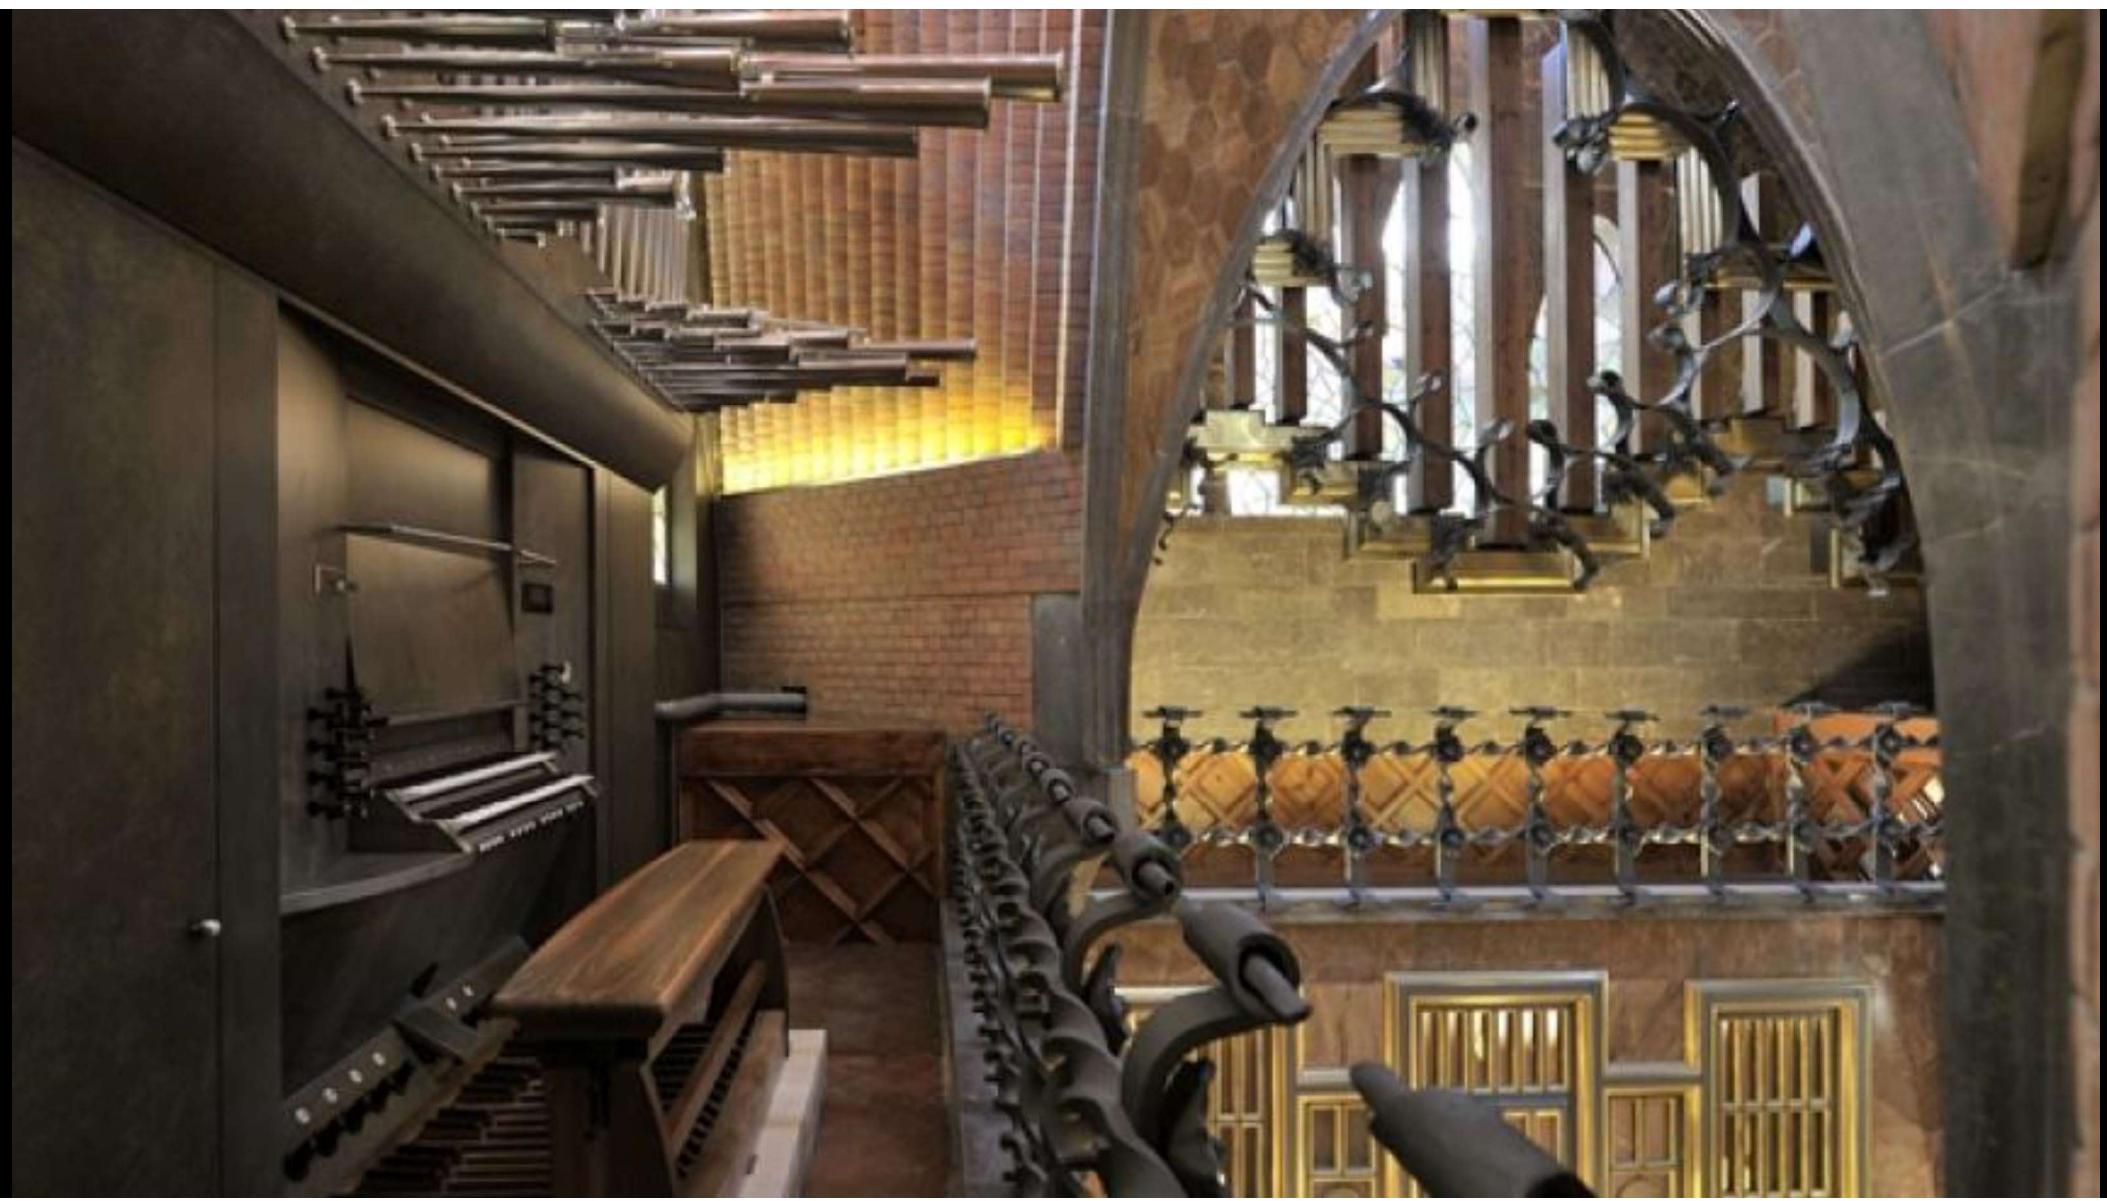

Main Floor

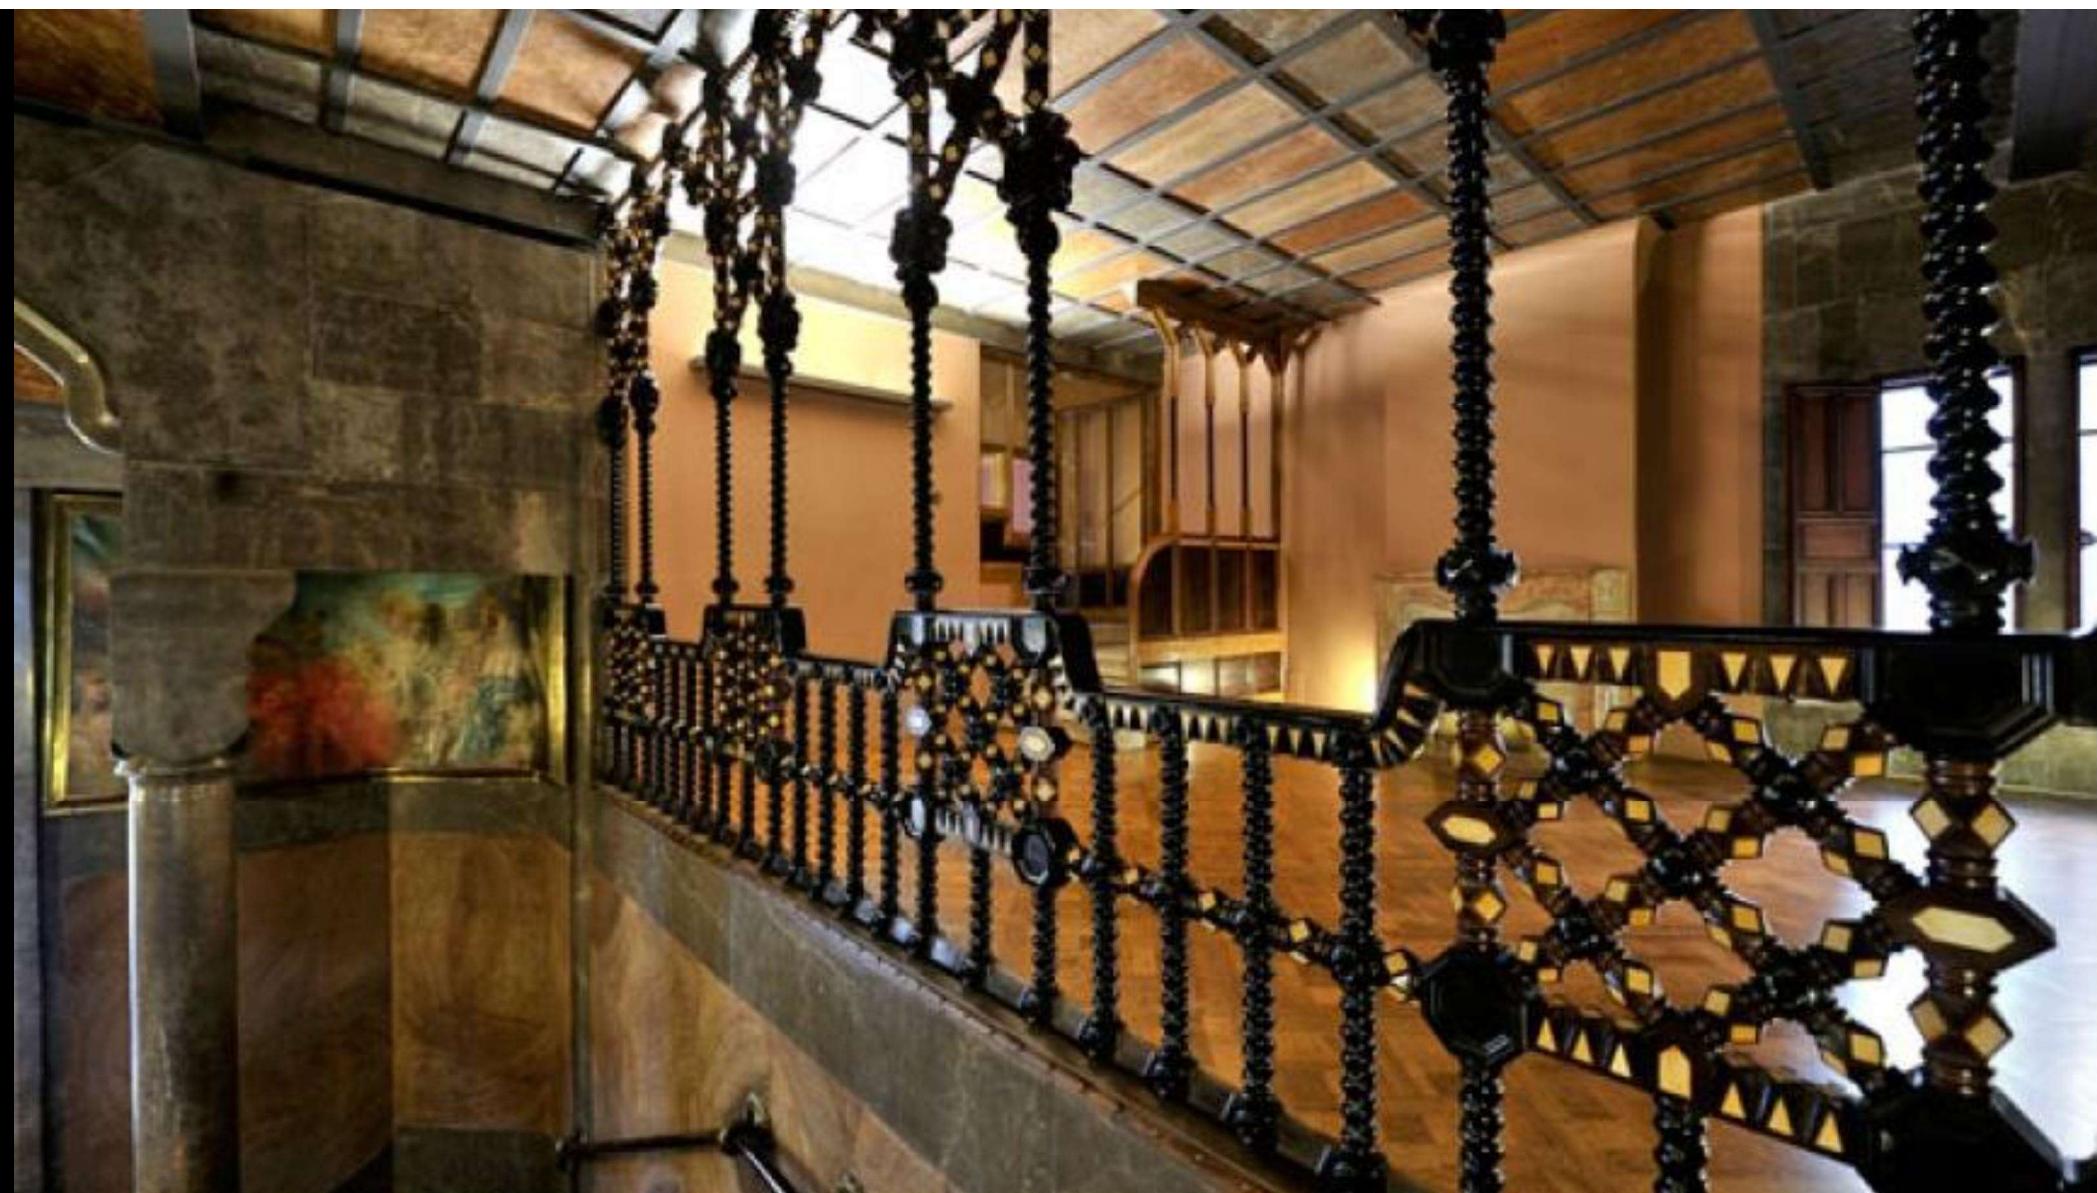

Once we reach the main floor, the building starts to resemble a palace. The rooms on this floor are on either side of the central hall, which is as high as the building.

Rooftop

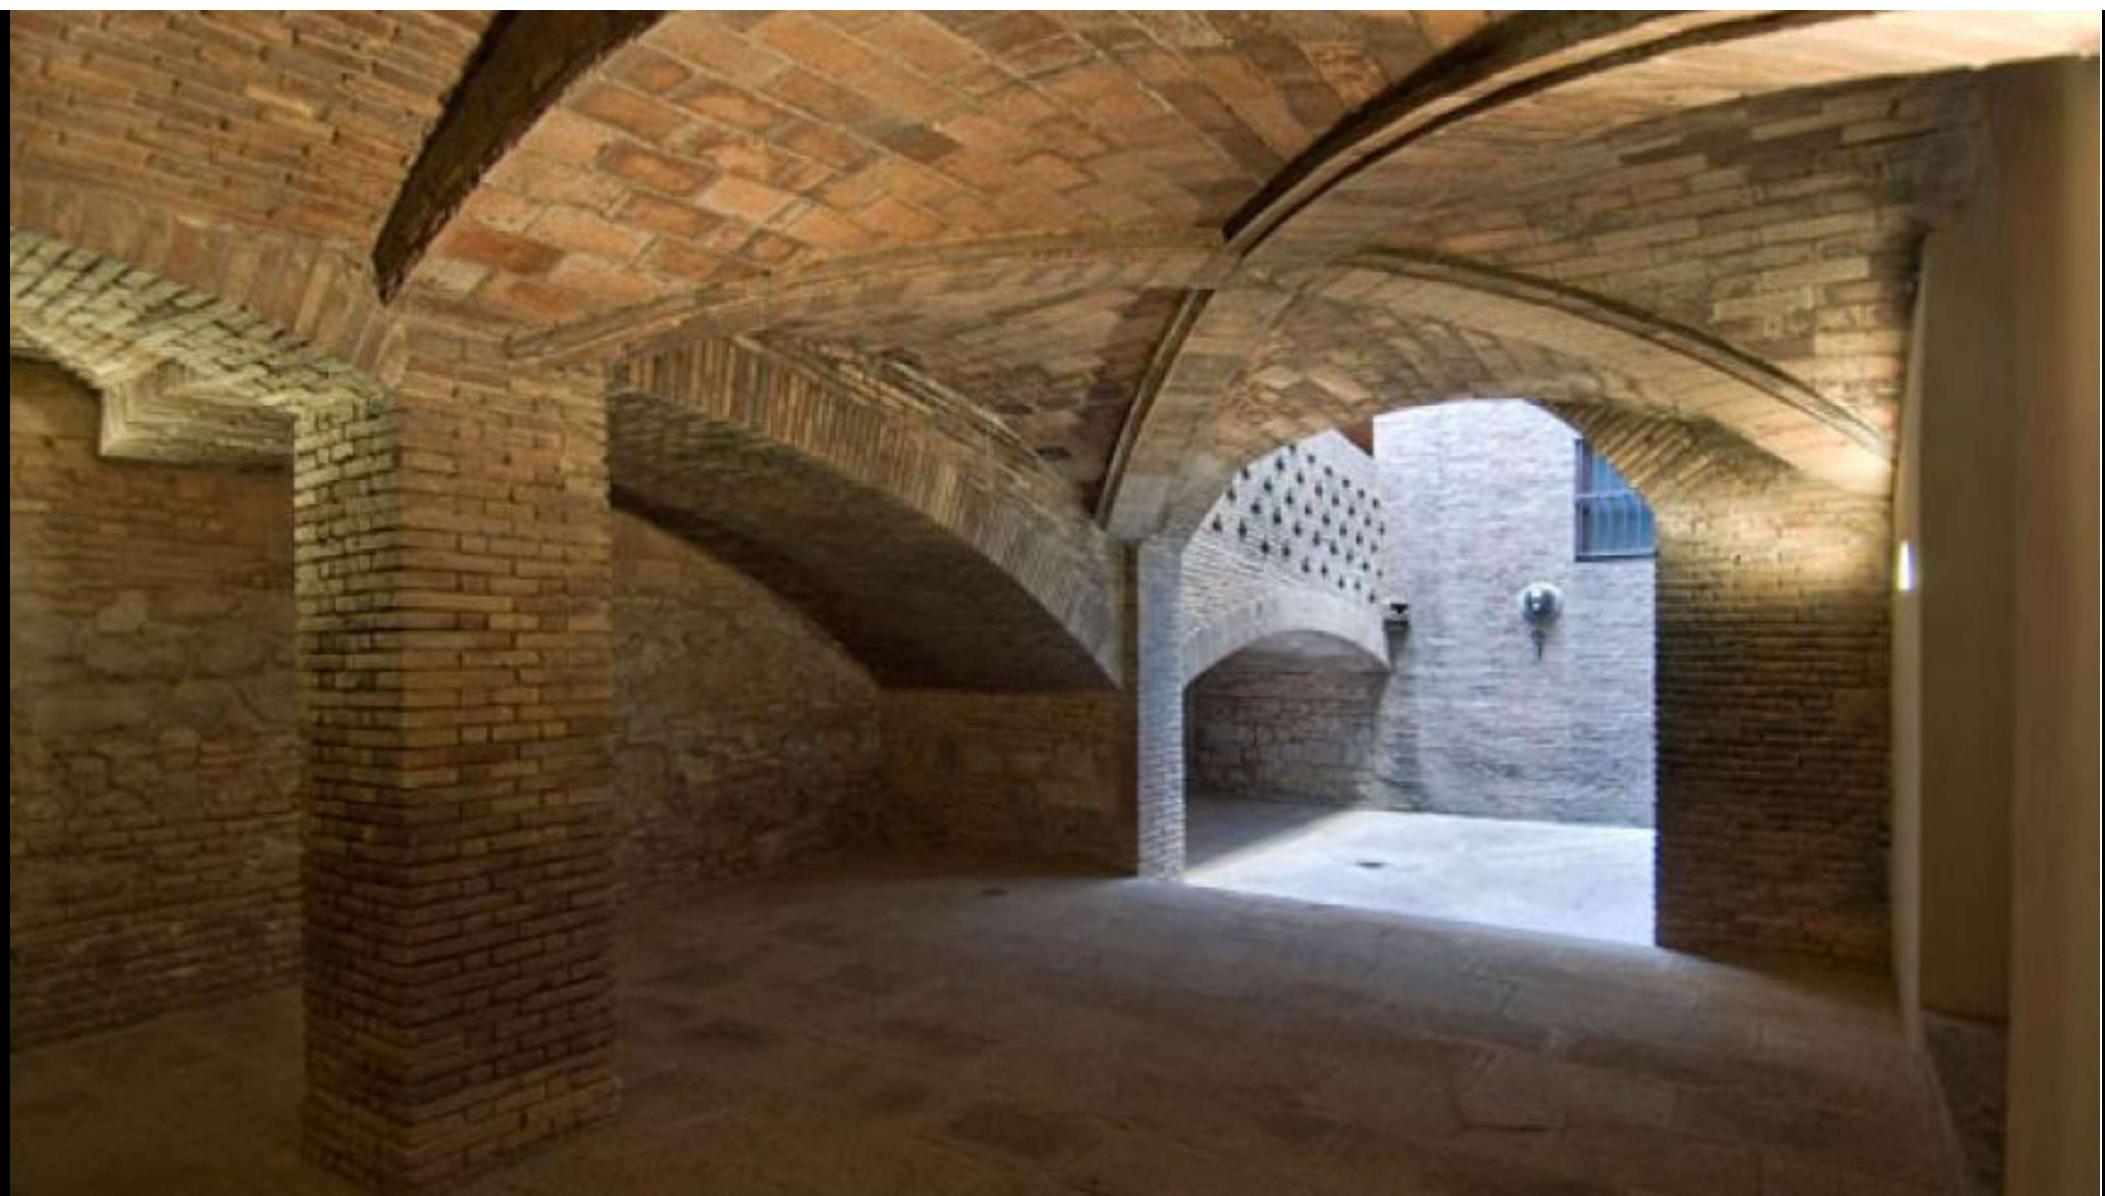

The roof is one of Güell Palace's magical corners and is outstanding for its twenty chimneys and central spire, which is 15 metres high.
